Memo to File:

RE: Office Meeting
Chevron Resources
Vernal Operations
ACT/047/007
Uintah County, Utah

On February 9, 1983 Mr. LeRoy Fyock of Chevron Resources met with Susan Linner and Tom Portle to affirm the adequacy of a proposed seed mix prior to placing an order and to discuss any preliminary comments on the MRP Addendum draft.

Salient points of the meeting:

1. A lack of shrubs in the seed mix despite apparently good success of shrubs in the annual operations report (MR Form 3).
2. Items of concern in the revegetation plan.
 - a. More detailed plans will be needed on areas to be reclaimed.
 - b. With two different vegetation types presented the success standard will need to be negotiated.
 - c. Seedbed preparation should be expanded on.

These concerns will be incorporated into the review letter to go out March 14, 1983.

THOMAS L. PORTLE
